

Activ Technologies Names Michael Stevens Director of Professional Services

For Immediate Release:

Roswell, GA, December 17, 2010

Activ Technologies, a leading provider of Enterprise Integration Solutions, recently hired and rapidly promoted Michael Stevens as Director of Professional Services.

Mike Roberts, president of **Activ Technologies** announced, "We are pleased to have Michael Stevens assume the role of Director of Professional Services for **Activ Technologies**. I am looking forward to working closely with Michael in this new role. His dedication and vision will be quite valuable as we continue to grow." Stevens originally joined **Activ Technologies** as a software developer. After demonstrating superior leadership and strong technical expertise in managing one of the firm's largest accounts, his talents made him ideal for his new and expanded role. Stevens will be charged with creating the vision for future services and overseeing delivery of all products and services.

Prior to joining Activ Technologies, Stevens served as the Software Architect at Siemens, where he was tasked with the design and management of new corporate integration. In that role, he solved complex and difficult aspects of the IT processes supporting payroll accounting for 4300 employees in 23 business centers. The project consisted of three SAP environments, fifteen applications, six web services and three external interchanges. When his project had been completed, his accomplishments had significantly reduced support costs, streamlined the accounting process from 7 - 10 days to 1 - 2 days and eliminated many of the manual IT processes.

Throughout his career, Stevens' had sought to refine his expertise and maintain active certifications in Project Management, BizTalk Server Architecture and Service-Oriented Architecture (SOA). His depth of experience comes from leading, designing and installing over 40 BizTalk applications for nine different customers.

Stevens is a graduate of the Institute of Technology in South Bend, Indiana, where he earned a bachelor's degree in electrical engineering. He currently lives in Roswell, Georgia with his wife, Jeanette. When he's not working, Michael enjoys nature hiking and spending time with his yellow Labrador retriever.
